

His philosophy is to conserve tissue, excising fat and skin only when absolutely necessary and minimising scarring by hiding incisions

pioneering surgical expertise and fast access to diagnostics and treatment. You can see from his work that Mr Henderson is a patron and collector of fine art; his appreciation for aesthetics and eye for detail makes him adept at reducing shadows and increasing reflected light around the eyes to give a more youthful appearance. And his clear, kind bedside manner leaves a long-lasting impression, as one recent patient explains: 'This was categorically one of the best experiences I have ever had. I would recommend him again and again.'

Mr Hugo Henderson

Top three treatments

BLEPHAROPLASTY SURGERY

Performed to both the upper and lower eyelids, blepharoplasty surgery can reduce hooding and puffiness to give a more open, youthful look.

NATURAL FILLER

This is often used in conjunction with blepharoplasty surgery. A small volume of fat (taken from the abdomen or thighs) is processed to concentrate the stem cells and natural factors, which are used to restore facial volume and natural skin texture, providing a more natural feel and appearance.

DACRYOCYSTORHINOSTOMY

Mr Henderson performs dacryocystorhinostomy without any incision through endoscopic surgery, which means there is no scar.

The eyes have it

For the invaluable expertise of an ophthalmic and oculoplastic surgeon, look to Hugo Henderson

THE EYES ARE PROBABLY THE MOST expressive area of the face. They reveal our deepest emotions and desires, but they can also show unwanted signs of ageing. One man who understands this better than most is Hugo Henderson, a highly experienced ophthalmic and oculoplastic surgeon, who applies his considerable skill to both aesthetic and ophthalmic surgery. Whether they're seeking

a light touch of wrinkle-smoothing Botox, undergoing upper or lower eyelid blepharoplasty, requiring cataract surgery, or simply wanting to look refreshed, Mr Henderson's patients benefit from expertise that you simply would not get from a general plastic surgeon.

For both cosmetic and surgical procedures, Mr Henderson specialises in achieving a natural look. His philosophy is to conserve tissue, excising fat and skin only when absolutely necessary and minimising scarring by hiding incisions on the inside of the eyelids. Increasingly, he is also seeing patients who have previously been treated with synthetic fillers in the lower eyelid tear trough area, which requires careful corrective surgery.

The London Clinic on Harley Street is a fitting backdrop for Mr Henderson's world-class work, offering a hotel experience in an eight-storey hospital with a concierge service, dietitian-led fine dining and exceptionally comfortable rooms. Crucially, this is combined with the hospital's trusted medical knowledge,

The London Clinic, 119 Harley Street, London W1G 6AU
